

Sittin' and Stitchn' with  
the Woolly Hares Group!

*With our Woolly girl Kathleen!*

Wednesday the 9th!

9:30 - 1:30 or so!

Bring your wool project  
and be inspired by other  
hookers and stitchers!

The gang meets at the  
Strouds Building!

### Wool Fun Facts

\*Wool fibers are naturally crimped so they can stretch from 30 to 50% of its original length. When the tension is released, the wool fiber will bounce back to its original shape.

\*Wool is resistant to mold and mildew.

\*Wool is naturally flame retardant.

Wool contains moisture in each fiber. It is the only fiber that will naturally resist flaming.
